

## LED Streetlights Series IV(EL-ST4CM)

E-Lover Street Light Series IV state of the art design with low light decay, high color rendering index PHILIP/OSRAM LED chip(50000hours lifespan) source light and high quality low weight aluminum alloy housing fill in a high brightness and long lifespan street light. Its innovative modular design and adjustable angle makes a perfect solution for multiple street lighting applications with minimum revamping cost.

### Applications:

## PRODUCT FEATURES

- State of the art design. Adopt the modern aesthetic streamline design, compact in structure and nice in appearance.
- High color rendering index PHILIPS SMD Chips LED chips(50000hours lifespan) source light with high-quality.
- Lightweight Aluminum alloy housing. Reliable aluminum alloy corrugated-fin composition, increasing the cooling area at utmost, reducing the light weight a lot. Modular lamp design which allows increasing or decreasing the illumination needs.
- Power factor $\geq 0.9$ . Adopt high-quality-high-efficiency constant current Meanwell driver(50000hours lifespan), to ensure the product's stability, also to reduce the power consumption greatly.
- Low temperatures. Long lifespan more than 50000hours.
- 5 years warranty, IP65 for waterproof.
- No mercury and lead. No UV. No infrared. No radiation. Without causing any flickering, helpful to protect the eyes.
- CE (TUV) for EMC and LVD approved and RoHS compliant.

## PRODUCT INSTALLATION:

---

Precaution: Switch off power before doing any works.

Step 1: Correctly connect three core input cable with the main cable from the light pole, and make sure its waterproof.

Step 2: Remove screws and nut from lamp installation parts.

Step 3: Insert lamp pole into the lamp installation hole.

Step 4: Tightly lock the screw and nut of the lamp installation parts.

## SAFETY

---

1. **Always** consult a qualified, licensed electrician prior to the installation of this product.
2. **Always** ensure that all components are joined properly before they are installed.
3. It is recommended that adequate airflow and heat sink be taken into account in the application and installation of this product. Improper thermal management may lead to premature failure.
4. If any doubt about the installation or use of this product, consult a competent electrician.
5. Exceeding the operating temperature values may damage LED chips by reducing the total lamp life and lumen output, and inversely impact color consistency.
6. Switch off power of the mains supply or respectively of the connection lead before doing any works.
7. Avoid voltage drops by using a dedicated line for each maximum power consumption line.
8. The manufacturer rates each power supply for maximum power output at optimum thermal and voltage conditions. As with any power supply, true actual maximum continuous current output depends upon various environmental factors such as ambient temperature, line voltage fluctuations, and orientation that may affect heat dissipation. For optimum performance, make sure the load is between 50% and 80% of the total capacity of the power supply.
9. LED products are continuously being improved upon in ever-shortening manufacturing cycles. LED color temperature (kelvin), lumen output, and product appearance can change from order to order. Please note that variation in color temperature (kelvin) is commonly +/- 250k and brightness (lumens) is +/- 10%.
